Subject: LA RH EGU Modeling: discussion with LDEQ today

Hi EPA Region 6 Air Quality Modelers (this is the title for you in the draft 114 letters .. let me know what you think ☺)

This is regarding LA RH EGUs, air quality screening modeling for exemption from BART.

My understanding of what was said by Vivian (LDEQ) on the monthly SIP call earlier today is:

- NRG: LDEQ has received modeling for Big Cajun 1 and 2. Big Cajun 1 screened out. Big Cajun 2 is proceeding with refined modeling.
- Cleco: told LDEQ they would have modelling for them tomorrow (May 1).
- Entergy: (as we learned previously they have been granted an extension by LDEQ until May 15, 2015) Will be contacting R6 with request for baseline change and possibly other changes (their modeler is named Jeremy I think)
 - o Louisiana indicated they would request that Entergy include Erik, Michael and Ashley on its email about modelling changes

Please be on the lookout for modeling questions coming from Entergy.

Thank you,
Ellen
